

Improve your technical capital

**Cibes Lift Group Technical
Training Programme 2014**

Cibes Lift Group
Training center

Boost your company's technical knowledge, generate a higher end result

I'm Jens Hoffman, Manager of Cibes Lift Group Technical Department. Starting from the autumn 2014, I'd like you or your technicians to visit us in Sweden to learn the same skills as my team.

We know that learning by doing is an outstanding concept and that some of your day-to-day operations will be easier with a higher technical skill level. In our set of four, fully-equipped workshop environments you will be able to work on all our lift types in the same area at our Technical Center.

We will run two programmes, installation and advanced installation in which we gradually go through how to assemble our products. We can also combine courses if you wish. Our teachers consist of the professional advisers that you usually meet in our technical support. They are well-versed in all sorts of troubleshooting and they will be helping you in our courses and tests.

You decide what course best suits your needs, and then ask us for a training solution. We also tailor-make courses to exactly fulfil your brief in order to boost your, or your technical crew's, knowledge levels. We assure you that this will create added value in timesaving and product understanding.

Welcome to the new Cibes Lift Group Training Center!

Basic Installation

- Cibes A4000 & A5000, Kalea A4 Primo Family, NTD A300/A400/A400H (3 days)
- Cibes A8000, Kalea A4 Mille, NTD A1000 (4 days)
- Cibes A9000, Kalea A4 Cabina GL, NTD A630C (4 days)
- Cibes A6000, Kalea A4 Cabina, NTD A400C (4 days)

We begin with the installation manual that technicians use when they assemble their first lift. We go through simple troubleshooting, complaints, web-shop and information how we, at Cibes Lift Group, work to achieve a better environment.

THE BASIC COURSE IS FREE OF CHARGE FOR ALL NEW DISTRIBUTORS

Advanced Installation

- Cibes A4000 & A5000, Kalea A4 Primo Family, NTD A300/A400/A400H (2 days)
- Cibes A8000, Kalea A4 Mille, NTD A1000 (2 days)
- Cibes A9000, Kalea A4 Cabina GL, NTD A630C (2 days)
- Cibes A6000, Kalea A4 Cabina, NTD A400C (2 days)

This course reviews safety circuits, 30 VDC, canbus, door opener, reading fault codes and numbers of trips, programming and wiring diagrams. It is primarily aimed at technicians with solid experience and sufficient knowledge to troubleshoot our products. If necessary, we can adapt courses to participants' pre-knowledge and needs. All training will end with a test in faultfinding.

WE CHARGE A FEE OF 200 € /PERSON/DAY FOR THE ADVANCED COURSE

Courses and training materials are in English
